Here's what I have so far. Please feel free to add additional items if you have some.

Action items from March 2012 grant meetings w/HDOH:

1. check w/QA (b) (6) to see what requirements are needed for DOH to use the state lab for their SRP and PA/SI work.
follow up: I've talked (b) (6), about requirements to use the state lab and have relayed the information back to (b) (6).
2. ask (b) (6), to give (b) (6) an update on arsenic guidance - use 50 to 60% bioaccessibility as a default?

3. DOH still needs bioaccessibility test data for swine and mouse studies.
follow up: I forwarded the mouse bioavailability data to (b) (6) last week and he has indicated in his emails that he will follow up w/ (b) (6).
4. ask (b) (6) to send slides for Contaminant Awareness Training.
follow up: (b) (6) has forwarded slides from the training.
5. Institutional controls - DOH is interested in how other states maintain/audit their institutional controls.
6. Northern Hawaiian Islands - NPL listing potential? Kure Atoll, National Monument, Federal Facilities?
7. Kalama'ulu Landfill - evaluate whether we should reassess the site to see if it still scores.
8. Honolulu Skeet Club - ask (b) (6) if EPA Removal can do the dive survey?
9. Kilauea - HDOH letter to EPA Removal going out shortly
10. DOH asked for assistance from CCLR to facilitate quarterly sustainability meetings.
11. Hickham - follow up (b) (6), on (b) (6), concerns re. cleanup levels. (b) (6) may follow up w/ DOD in HQ?
follow up: I spoke (b) (6), re. the site cleanup and have additional information we can discuss next wed.

Subject: Hickam Air Force Base

Aloha (b) (6), (b) (7), once again, mahalo nui for meeting with DOH and I on the Aldrin/Chlordane issue pertaining to Hickam.

I understand that you have spoken with DOH HEER and they are handling the situation and that was where it was left.

Recently, DOH Hazardous Waste and I had a meeting with HICKAM OIG, who are deeply concerned about the situation as the figures allowed were elevated from EPA standards based upon the reasoning that families only reside on base for 3 to 5 years. According to these agents that may not be the case because as soldiers are shipped off families remain on base. The agents stated that the allowable formula used by Actus and agreed to be DOH HEER was faulty as some people and families may live in that housing for up to 20 years.

Additionally, the agents informed me that Actus not only leases the property but are solely responsible for all aspects of the remediation and remodeling of the military housing including all costs. The agreement was set up that Actus pays all costs associated with the housing and controls the area for 50 years. Actus gets their payback when families start moving in and all the rental fees go directly to Actus. The agents believe that Actus recovers all costs by the end of the 5th year and then for the next 45 years pockets all the rental fees. Actus controls and runs the site and Hickam has nothing to do with it.

HICKAM OIG is requesting EPA Superfund to take samples of all areas where families are and will be residing. The agents have concerns about DOH HEER due to the fact that ACTUS was allowed to raise the levels significantly based upon an incorrect assumption. In addition, the area of concern, Earhart 1-4, which was initially tested "hot" for Aldrin and Dieldrin, then 1 foot cleared off and replaced with "clean dirt" only to test "Hot" again and then DOH HEER giving ACTUS approval to retest the same site without cleaning the top layer of dirt and the sample coming back below the "Hot" level made them skeptical as to whether the sampling was being conducted correctly the second time.

One of the agents actually lives on the site in question and was not so much concerned about his family but was deeply concerned about the 6 month old that lived next door to him who played in the dirt.

I am not sure how to handle this or who they should write a letter of request, but I thought it best to ask you both and if you can let me know the process or if this is something that you can handle please let me know.

I appreciate any help you can give on this situation.

Aloha (b) (6), (b) (7), once again, mahalo nui for meeting with DOH and I on the Aldrin/Chlordane issue pertaining to hickam. I understand that you have spoken with DOH HEER and they are handling the situation and that was where it was left.

Recently, DOH Hazardous Waste and I had a meeting with HICKAM OIG, who are deeply concerned about the situation as the figures allowed were elevated from EPA standards based upon the reasoning that families only reside on base for 3 to 5 years. According to these agents

that may not be the case because as soldiers are shipped off families remain on base. The agents stated that the allowable formula used by Actus and agreed to be DOH HEER was faulty as some people and families may live in that housing for up to 20 years.

Additionally, the agents informed me that Actus not only leases the property but are solely responsible for all aspects of the remediation and remodeling of the military housing including all costs. The agreement was set up that Actus pays all costs associated with the housing and controls the area for 50 years. Actus gets their payback when families start moving in and all the rental fees go directly to Actus. The agents believe that Actus recovers all costs by the end of the 5th year and then for the next 45 years pockets all the rental fees. Actus controls and runs the site and Hickam has nothing to do with it.

HICKAM OIG is requesting EPA Superfund to take samples of all areas where families are and will be residing. The agents have concerns about DOH HEER due to the fact that ACTUS was allowed to raise the levels significantly based upon an incorrect assumption. In addition, the area of concern, Earhart 1-4, which was initially tested "hot" for aldrin and dieldrin, then 1 foot cleared off and replaced with "clean dirt" only to test "Hot" again and then DOH HEER giving ACTUS approval to retest the same site without cleaning the top layer of dirt and the sample coming back below the "Hot" level made them skeptical as to whether the sampling was being conducted correctly the second time.

One of the agents actually lives on the site in question and was not so much concerned about his family but was deeply concerned about the 6 month old that lived next door to him who played in the dirt.

I am not sure how to handle this or who they should write a letter of request, but i thought it best to ask you both and if you can let me know the process or if this is something that you can handle please let me know.

I appreciate any help you can give on this situation.

Advice? CID has asked us to look into criminal activity at a former fed fac.

Aloha (b) (6), (b) (7)(C) --i received an email from the agent as well as spoke with Hickam Attorney--they are requesting samples to be taken asap. Please advise who i should be dealing with to help them. the Hickam Attorney would like to write a letter requesting such action but does not know who to address it to -please let me know if you know who I can talk to about this.

thanks, (b) (6), (b) (7)(C)

Aloha (b) (6), (b) (7)(C)

Who is the contact at Hickam OIG? I think that would be the person for us to talk to. We can work with our FedFac people here.

Thanks for following up.

Aloha (b) (6), (b) (7), once again, mahalo nui for meeting with DOH and I on the Aldrin/Chlordane issue pertaining to Hickam. I understand that you have spoken with DOH HEER and they are handling the situation and that was where it was left.

Recently, DOH Hazardous Waste and I had a meeting with HICKAM OIG, who are deeply concerned about the situation as the figures allowed were elevated from EPA standards based upon the reasoning that families only reside on base for 3 to 5 years. According to these agents that may not be the case because as soldiers are shipped off families remain on base. The agents stated that the allowable formula used by Actus and agreed to be DOH HEER was faulty as some people and families may live in that housing for up to 20 years.

Additionally, the agents informed me that Actus not only leases the property but are solely responsible for all aspects of the remediation and remodeling of the military housing including all costs. The agreement was set up that Actus pays all costs associated with the housing and controls the area for 50 years. Actus gets their payback when families start moving in and all the rental fees go directly to Actus. The agents believe that Actus recovers all costs by the end of the 5th year and then for the next 45 years pockets all the rental fees. Actus controls and runs the site and Hickam has nothing to do with it.

HICKAM OIG is requesting EPA Superfund to take samples of all areas where families are and will be residing. The agents have concerns about DOH HEER due to the fact that ACTUS was

allowed to raise the levels significantly based upon an incorrect assumption. In addition, the area of concern, Earhart 1-4, which was initially tested "hot" for aldrin and dieldrin, then 1 foot cleared off and replaced with "clean dirt" only to test "Hot" again and then DOH HEER giving ACTUS approval to retest the same site without cleaning the top layer of dirt and the sample coming back below the "Hot" level made them skeptical as to whether the sampling was being conducted correctly the second time.

One of the agents actually lives on the site in question and was not so much concerned about his family but was deeply concerned about the 6 month old that lived next door to him who played in the dirt.

I am not sure how to handle this or who they should write a letter of request, but i thought it best to ask you both and if you can let me know the process or if this is something that you can handle please let me know.

I appreciate any help you can give on this situation.

Mahalo nui, aloha, (b)
